Marshmallow costume for kids

As my daughter wanted her tail to get up right, I needed to add a frame. If you plan to bring only the queue down, you can skip this step. You'll need wire hangars (I used 2)Unwrap twisted ends and straighten as much as you can. Twist ends of 2 different hangars to give yourself a long wire and then fold in half (but with rounded, not pointed end) and slide into the tail. Straighten it and fill the edges of the fabric tail. Using the zipper foot on your sewing machine, topstitch through the two layers of tail as close to the wire as you can get to create a casing for the wire and keep it in place.
